## **Together for a better tomorrow**

L. A-M, cls. a V-a,  
Școala Gimnazială “O.C. Tăslăuanu”-Bilbor,  
prof. L. A-M

Let's walk as one, both big and small,  
With love and kindness for us all,  
If we stand strong and help each day,  
A brighter world is on its way.

A smile can shine, a hand can guide  
With friends and hope close by your side.  
No dream too big, no step too small,  
Together, we can change it all.

The sun will rise, the dark will fade,  
If love and peace are what we trade.  
A world where all can laugh and grow,  
Is up to us-we shape the flow.

So, take my hand, let's start today  
With gentle words and hearts that stay.  
Trough every joy and every sorrow,  
We build a better world tomorrow!

## Together for a Better Future - Pollution

F.R, cls a VI-a A  
LVPNB, Beiuș  
prof. T.M

Nowadays, pollution and waste are serious problems that affect our environment. Every day, tons of plastic, paper, and other materials are thrown away without thinking about the consequences. If we work together and take responsibility, we can create a cleaner and healthier planet for future generations. One of the most effective ways to do this is through recycling.

Recycling helps reduce waste, saves natural resources, and lowers pollution. Instead of throwing away plastic bottles, cans, or old newspapers, we can reuse them to create new products.

This way, we use fewer raw materials and protect forests, water sources, and wildlife. Moreover, recycling reduces the amount of garbage in landfills, preventing harmful chemicals from polluting the air and soil.

But recycling is not just an individual effort—it is something we must do together. Schools, communities, and governments should work as a team to promote recycling programs and educate people about its importance.

Organizing clean-up events, setting up recycling bins in public places, and teaching children about eco-friendly habits can make a big difference.

If everyone makes a small effort, we can achieve great results. A simple action, like sorting waste at home or using reusable bags, can contribute to a cleaner world. Let's act now, because every step counts!

## Steps we can take for a better future.

T.L, cls. a VII-a  
Șc. Gimn.”Prof. Gheorghe Dumitreasa” Girov  
prof. O. L-P

A better future happens when we all work together. By combining our strengths, we can create a world that's better for everyone.

The ways of bringing about a better future may come in the form of helping each other.

Sometimes, small acts of volunteering or sharing can make all the difference in the world. We must take care of our elders, vulnerable people and those in need of help at any time. Kindness defines us as humanity. If we forget it, we forget who we are and what we were created for. No one should be left behind and no one should live a life full of misery and suffering. It is in our power to alleviate the souls of the ones who are in distress.

Education is the key which opens up opportunities for everyone.

By supporting schools and sharing knowledge, we can all become successful.

I strongly believe that educated people have better chances at understanding how to live a greater life in the future because through education they learn how to solve problems without violence. Treating everyone equally and fighting injustice keeps a society fair. Instead of bombing each other, people might actually learn how to work together to repair what they have broken and insure a safer environment for their next generations.

Helping each other, protecting the planet, striving for equality, all these will make a better future for all of us.

## A better future starts with us

R.F, cls. a VII-a  
Şc. Gimn.”Prof. Gheorghe Dumitreasa” Girov  
prof. O. L-P

For the world to become a better place, it is important that everyone works together and contributes in their own way.

One of the most effective ways to make a positive change is by promoting education for all. Education can help children and adults learn how to treat others with kindness and respect.

When we understand that everyone is important and deserves to be treated fairly, we can create a world where people feel safe and happy.

Schools can teach students how to work together to solve problems. When people learn teamwork, they can come up with better ideas to fix big issues.

School can also reduce hate and build peace between nations. By learning about different countries, languages and traditions, education helps us understand and respect people who are different from us.

Also, if everyone has access to education, rich and poor, more people will have the chance to achieve their dreams. This means less inequality and more opportunities for everyone.

Talking about dreams and jobs, schools can prepare students for jobs of the future by teaching skills like technology, critical thinking and creativity. This will help more people find work and solve future challenges.

One of the future challenges is protecting the Earth. Education can teach children why it is important to take care of our planet. When we learn about recycling, saving energy and protecting animals, we can make sure Earth stays beautiful for future generations. But in order to have a clean Earth, we also need an open mind. That is where schools help. They can teach students how to take care of their mental health. This can help people manage stress, build confidence and stay positive, which leads to happier and healthier communities.

When education is enjoyable, more people will want to learn. Fun lessons can inspire students to stay curious and keep learning throughout their lives, making the world smarter and better. A better future starts with what we learn today. Education gives us the tools to create a world full of kindness, opportunities, hope and more!

## The story of lightning

B.E, cls a V-a  
LTP Baia Mare  
prof. CD

Once upon a time, there was a beautiful, kind, and hardworking girl. However, she was sad because she was an orphan.

The clouds felt sorry for the girl and started crying with her, sending rain, thunder, and lightning.

One day, when a lightning bolt split the sky, the little girl got scared. A kind woman saw what happened and told the girl to relax, explaining that the clouds were taking photos of her because she was such a beautiful and good-hearted girl.

From that day on, every time people feel sad, the sky lights up with flashes of lightning.

As the years passed, the girl grew into a strong and wise woman. She dedicated her life to helping others, especially children who felt lonely or abandoned, just as she once had. She became known throughout the land for her kindness, and people traveled from far away to seek her advice and comfort.

One night, as she sat by her window watching a storm roll in, she smiled. She no longer feared the lightning. Instead, she saw it as a reminder that no one was ever truly alone.

The sky, the clouds, and even the universe itself shared in human emotions, connecting everyone through light and sound. When the girl's time on Earth came to an end, the sky mourned her loss, and the most spectacular lightning storm the world had ever seen lit up the heavens. But the people did not feel afraid—they knew it was the sky honoring the girl who had brought so much kindness into the world.

And so, whenever lightning flashes across the sky, it is said to be a sign that she is still watching over those who feel lost, reminding them that they are never truly alone.

## The magic of working together

L.R, cls a VII-a C  
Școala Gimnazială Nr 12 Tulcea  
prof. R.OI

The grand oak tree in our school gardens has silently witnessed countless stories over the years. Its branches spread wide, offering shade to everyone who gathers beneath. This morning, as I perch under its leaves, I spot something rather special. Colourful notes flutter from the lower branches, dancing in a gentle breeze. Each one holds a dream, a wish, or an idea penned by my classmates about how we might make our world a better place. Sophie wrote about planting more saplings in our neighbourhood. James suggested organizing weekly litter-picking sessions at the local park. Lucy dreams of starting a small lending library where children can share their favourite books. As I read each note, I realize that on their own, these might seem like modest ideas. But together, they weave into something rather magnificent.

I reach into my rucksack for a piece of paper and a pen, ready to add my own dream to the tree. That's when my best friend Oliver plops down beside me, his eyes twinkling with excitement. „I've got a brilliant idea”, he says, „and I reckon we could make it happen if we work together...”

Oliver leand closer, lowering his voice as if revealing a big secret. „What if we create a club? A team dedicated to making these ideas happen?” His wide smile and radiant face always convince me to agree with him, so I nod. „A club?” I ask. „Like an actual group at school?”

„Yes, we could meet once a week underneath this tree and choose an idea, and somehow we could make it happen! For example, we could make Sophie’s wish come true by planting some saplings, same for the other ideas. Maybe we could even get teachers involved.”

As we speak, I gaze at the fluttering notes, and I imagine how each of them would get us a step closer to a better community. „Let’s do it!” I speak up after a moment of silence. The next day, we needed members, so Oliver and I asked almost everyone to participate. Some didn’t want to contribute, but most of them did. We gathered around forty students, and also four teachers liked our idea. Now that we had people to work with, we began making changes in our neighbourhood, slowly, but everything counted.

We planted saplings and flowers, cleaned the parks, and we even opened a lending library, just like Lucy wanted. Every week, we did something new, and our city began to look more vibrant and luminous.

After some weeks of hard work, we accomplished our biggest project: we restored a forgotten park located near the exit of our city. It needed a lot of care, but in the end, we made it look unrecognizable! We planted lots of plants, installed benches, and even improvised a small playground for the kids with the help of some of our parents. Everything was going well when one day, Oliver and I went to the park to relax.

We were walking when we saw the disaster. We couldn’t believe our eyes. The park was entirely ruined! The benches were covered with graffiti, most of the flowers were ripped off, and two swings were barely holding onto their bars. I looked at Oliver and could see how furious he was. We swiftly went to school and told everyone what had happened. Someone had deliberately destroyed our beloved place.

We frantically contacted the police, and fortunately, there were security cameras nearby that caught the culprits. A group of boys from our school had been destroying what we had worked so hard to build. They paid for the damages they had caused, and soon the park was restored.

This incident, however, taught us an unexpected lesson. We learned that building something beautiful is just the beginning – protecting and nurturing it requires the whole community’s dedication. Our club grew stronger after that day. We started organizing community watch groups and educational programs about environmental responsibility. The vandals even joined our club eventually, discovering that creating something is far more rewarding than destroying it.

Today, a year later, I sit under the same oak tree where it all began. New notes flutter among its branches, carrying fresh dreams and ideas. But now, when I look around our neighbourhood, I see more than just improved parks and planted trees. I see the power of united young minds, the strength of community spirit, and the proof that even the smallest dreams, when shared and supported, can transform an entire neighbourhood. Our club continues to grow, and with each passing season, like our beloved oak tree, we spread our branches further, creating shade and inspiration for generations to come.

## Side by side in the future

A.G, cls. a VII-a  
Școala Gimnazială Nr. 1 Horoatu Crasnei  
prof. C. DM

Together strong, we light the way,  
With hope and love, we build each day  
A world of kindness, bright and free,  
For every heart, for you and me.

No dream too big, no step too small,  
When hand in hand, we give our all.  
Through storms and trials, we'll endure,  
With faith and courage, strong and pure.

We plant the seeds of peace and trust,  
A future fair, a world that's just.  
With every voice and every hand,  
Together now, we take a stand.

The Earth we share, the sky so wide,  
No walls can break the love inside.  
Through learning, care and words so true,  
We'll shape the world in shades of new.

So side by side, let's rise and grow,  
With open hearts, let's let love flow.  
A better place is ours to make,  
With every choice and step we take.

## A magic future

M.IM, cls. a VI-a  
Școala Gimnazială „O.C. Tăslăuanu” Bilbor  
prof. L. AM

Kindness flows like rivers of trust,  
In this world a lot of amazing people surround us,  
Nobody deserves to be left out  
Discrimination isn't the right path.

Peaceful mind, peaceful soul,  
Empathy connects hearts across the world,  
A bit of love can fix the planet,  
Charmed hearts filled with kindness would feel like a warm blanket,  
Ending division, embracing peace is the way to happy adults and kids.

Green trees, green fields,  
Red poppies, red roses,  
Enchanted life, enchanted nature,  
Everybody should take care of the planet as a pleasure,  
Now let's build a better future and take care of this green treasure!

## All for a Better Future

L.ES, cls. a VIII-a  
Liceul Tehnologic Bălteni  
prof. R.C

We plant the seeds with hope and care,  
A world of kindness, pure and fair.  
Through storms we walk, through nights so deep,  
Yet dreams of light we always keep.  
With hands united, strong and true,  
We build the path for what is new.  
No fear can break the steps we take,  
For love and peace are ours to make.  
The past may whisper, loud and wild,  
Yet in our hearts remains the child—  
Who dares to dream, who dares to try,  
To paint new stars upon the sky.  
So let us rise with voices bright,  
And shape the dawn from darkest night.  
With hope and courage, side by side,  
A better future will arise.

## TO GET THERE...TOGETHER...

B.D, cls. a VII-a  
Liceul Teoretic „O. C. Tăslăuanu” Toplița  
prof. F.A

We all dream of a better future, of a world where people help each other, where kindness matters, and where no one is left behind. But no one can build that future... alone. The only way to truly move forward is by standing up, lifting each other up, and working together.

Think about it. Every great change in history happened because people worked together. Whether it was fighting for rights, discovering new things, or simply helping a community grow, progress has always been about teamwork. When we support each other, we turn dreams into reality, and that's what makes us human in a way.

But it's not just about big changes. Even the smallest gestures can shape the world around us. A smile, a kind word, helping someone in need, these things may seem small, but they create ripples that reach far beyond what we can see. A single act of kindness can inspire another, and before we know it, we've built something bigger than we can wrap our head around. Our grandchildren will be the next future, and for that we need to step up and demonstrate the humble concept of "teamwork".

A world where pollution, tyranny, deforestation are becoming a problem, we can work together in order to fix those problems and establish a greater connection with each other and in hopes, restoring our planet. Afterwards, we can do whatever. As long as we don't ruin what we've accomplished in the process. That's why our differences shouldn't separate us. They should bring us together. We all have something to offer, and when we combine our strengths, we can create something truly amazing. It's not about being the same, it's about learning from each other and growing together.

So, how do we get to that future? By choosing to care. By choosing to listen. By choosing to stand together, even when it's sometimes way easier walking off alone. Because no matter how difficult the journey may seem, one thing is certain: To get there... together is the only way.

## The world and its problems

C.R, cls. a VI-a  
Şc. Gimn. "Prof. Gheorghe Dumitreasa" Girov  
prof. O. LP

I think making a better world is obviously hard. Needing to raise lots of funds for the projects, doing what you have planned, finding ways to convince people to listen to your words and actions of stopping doing harmful things to the environment, animals or themselves.

So I'll discuss about information on two cases I decided to talk about and how I would solve them or slow down their damage. The first topic is overfishing. If you're unfamiliar to this term, overfishing means hunting marine life faster than it can reproduce. In this topic we will talk about shark overfishing since it's currently a worldwide problem. Sharks are often hunted for their fins, cutting them apart from their bodies; then the body is being thrown away leaving the shark to drown due to them needing to swim to breathe the amount of oxygen they need to survive.

Their fins then are used for medicine, being an ingredient in some pills. Although it was proven that shark fins don't give the healing effects they were supposed to give and rather make your health worse, people still don't believe it and continue harvesting them. My solution to this would be to make a law so that every shark species is illegal to hunt, only making exceptions if a species which isn't endangered is infesting public or private bodies of water. Other than saving millions of shark lives it can also save the ocean from further pollution of their decaying bodies and the expired medicine being thrown away.

Deforestation is the second topic I want to touch. It is common knowledge that this problem has been for years yet the numbers keep increasing than decreasing, showing how people aren't trying to eliminate it. Last year, fifteen billion trees were cut, yet only two hundred and eighty million were planted. The polluted air is becoming thicker as the number of trees decreases and this leads to even more people dying of heart attacks. My first solution to this would be to raise taxes for people who use thermal plants and encourage them to buy solar panels to warm their homes by decreasing the price and producing lots of them.

My second solution would be a law that for every tree cut there should be at least one tree planted in the

nearest forest. I would hire people to check if the lumberjacks are following this law.

Of course, there are many other problems in the world. The educational system, the economy, human, race and gender rights, but I decided to talk about the ones above because they have easier solutions.

In conclusion, there are too many things to fix in one, but if we all try our best to help, these problems will slowly fade away and make a better world for plants, animals and humans to live in.

## Together for a better future

V. AM, cls. a VII-a  
Liceul Tehnologic Telciu  
prof. V. AE

The future is what we make of it. If we want it to be bright and full of hope, we need to take action today. A better future means a happier world, a cleaner Earth, and people working together to make life better for everyone.

One of the most important things we can do is taking care of our planet. Earth provides everything we need to live, like clean water, fresh air, and food. But right now, pollution, deforestation, and waste are hurting it. We need to step up and do our part, we should recycle, plant trees, save energy, and keep our environment clean. These small actions may not seem like much on their own, but when millions of people do them, they can make a huge difference.

Another step toward a better future is helping others. Many people around the world struggle with hunger, poverty, and loneliness. If we lend a helping hand by sharing what we can and showing kindness, we can make their lives easier. Even small acts like donating food or clothes, or simply being there for someone, can create a ripple effect of positive change.

Most importantly, teamwork is the key to a better future. Alone, we can only do so much. But together, we have the power to fix big problems and create a world that is safe, fair, and full of opportunities for everyone.

When people work as a team, their differences don't matter—they come together with one goal: making life better for all.

The future isn't just something far away—it's built on what we do now. By caring for the Earth, helping others, and working together, we can create a world where everyone feels happy and hopeful. It's not just a dream—it's something we can achieve together, one step at a time.

## Together for a better education

L.E, cls. a VI-a  
Șc. Gimn. nr.1 Derna  
prof. P.S

In my opinion, a big part of our future is based on school. This place should be a healthy environment where we can form ourselves and gather new knowledge. There are children that go home from school every day without wanting to return. There are many kids who are afraid to go to school and hate school. From my perspective, with a little involvement, we can change that. I have some improvements that I think would help.

In first place, I would hire an assistant teacher for children with special needs (CES). In my classroom there are three children like that and they are struggling. If we just ignore them and let them fail over and over again, their future would be ruined. If we make a classroom especially for them, they wouldn't be integrated. The best solution is to hire for every teacher an assistant to help these children. If teachers would take care of them, they would neglect the other children.

In the second place, we should organize surprise controls for teachers to evaluate them. In some schools, there are teachers that don't do their jobs properly and children who are passionate about a special subject are stooped or held to go further with their passion or dream. Other teachers haven't got any patience with students and burst out in arguments or they bring their anger from other reasons on children. Kids get scared easily and haven't got a healthy environment to grow because of these teachers.

In third place, I would prevent bullying. Often students don't want to return to school because they are made fun of or are bullied. Children suffer from this and can't focus on their studies. Kids need to be encouraged to speak out. Silence is violence too. Often children are overwhelmed and are afraid to speak. Teachers should encourage students to speak, teachers should take action and punish bullies.

In conclusion, school is really important in everyone's life and should be improved for a better future. Children are our future. It depends on us the way we form our children, because they are the reflection of our future.

## Today here, tomorrow where?

G.R, cls. a VI-a  
Şc. Gimn. nr. 1 Derna  
prof. P.S

Today I would like to discuss about the way we could change this world and perhaps make it better. In this world there are lots of people and not everyone is organized or care about the things that surround him. The humans on this world should start being more careful when it comes to keep the world healthy.

For example, they shouldn't cut down that many trees and if they do so, they better replant them or chose another way to save the environment. I think they like fresh air, everyone does, but is more likely just to cut the trees and forget to replant them.

Now, on the other part of the world, the oceans, seas, rivers, they also need to be kept clean because the species that live in water should have also a clean environment and to grow healthy without any barriers.

If people don't stop polluting aquatic creatures will go extinct, like fish, sharks, dolphins and so on.

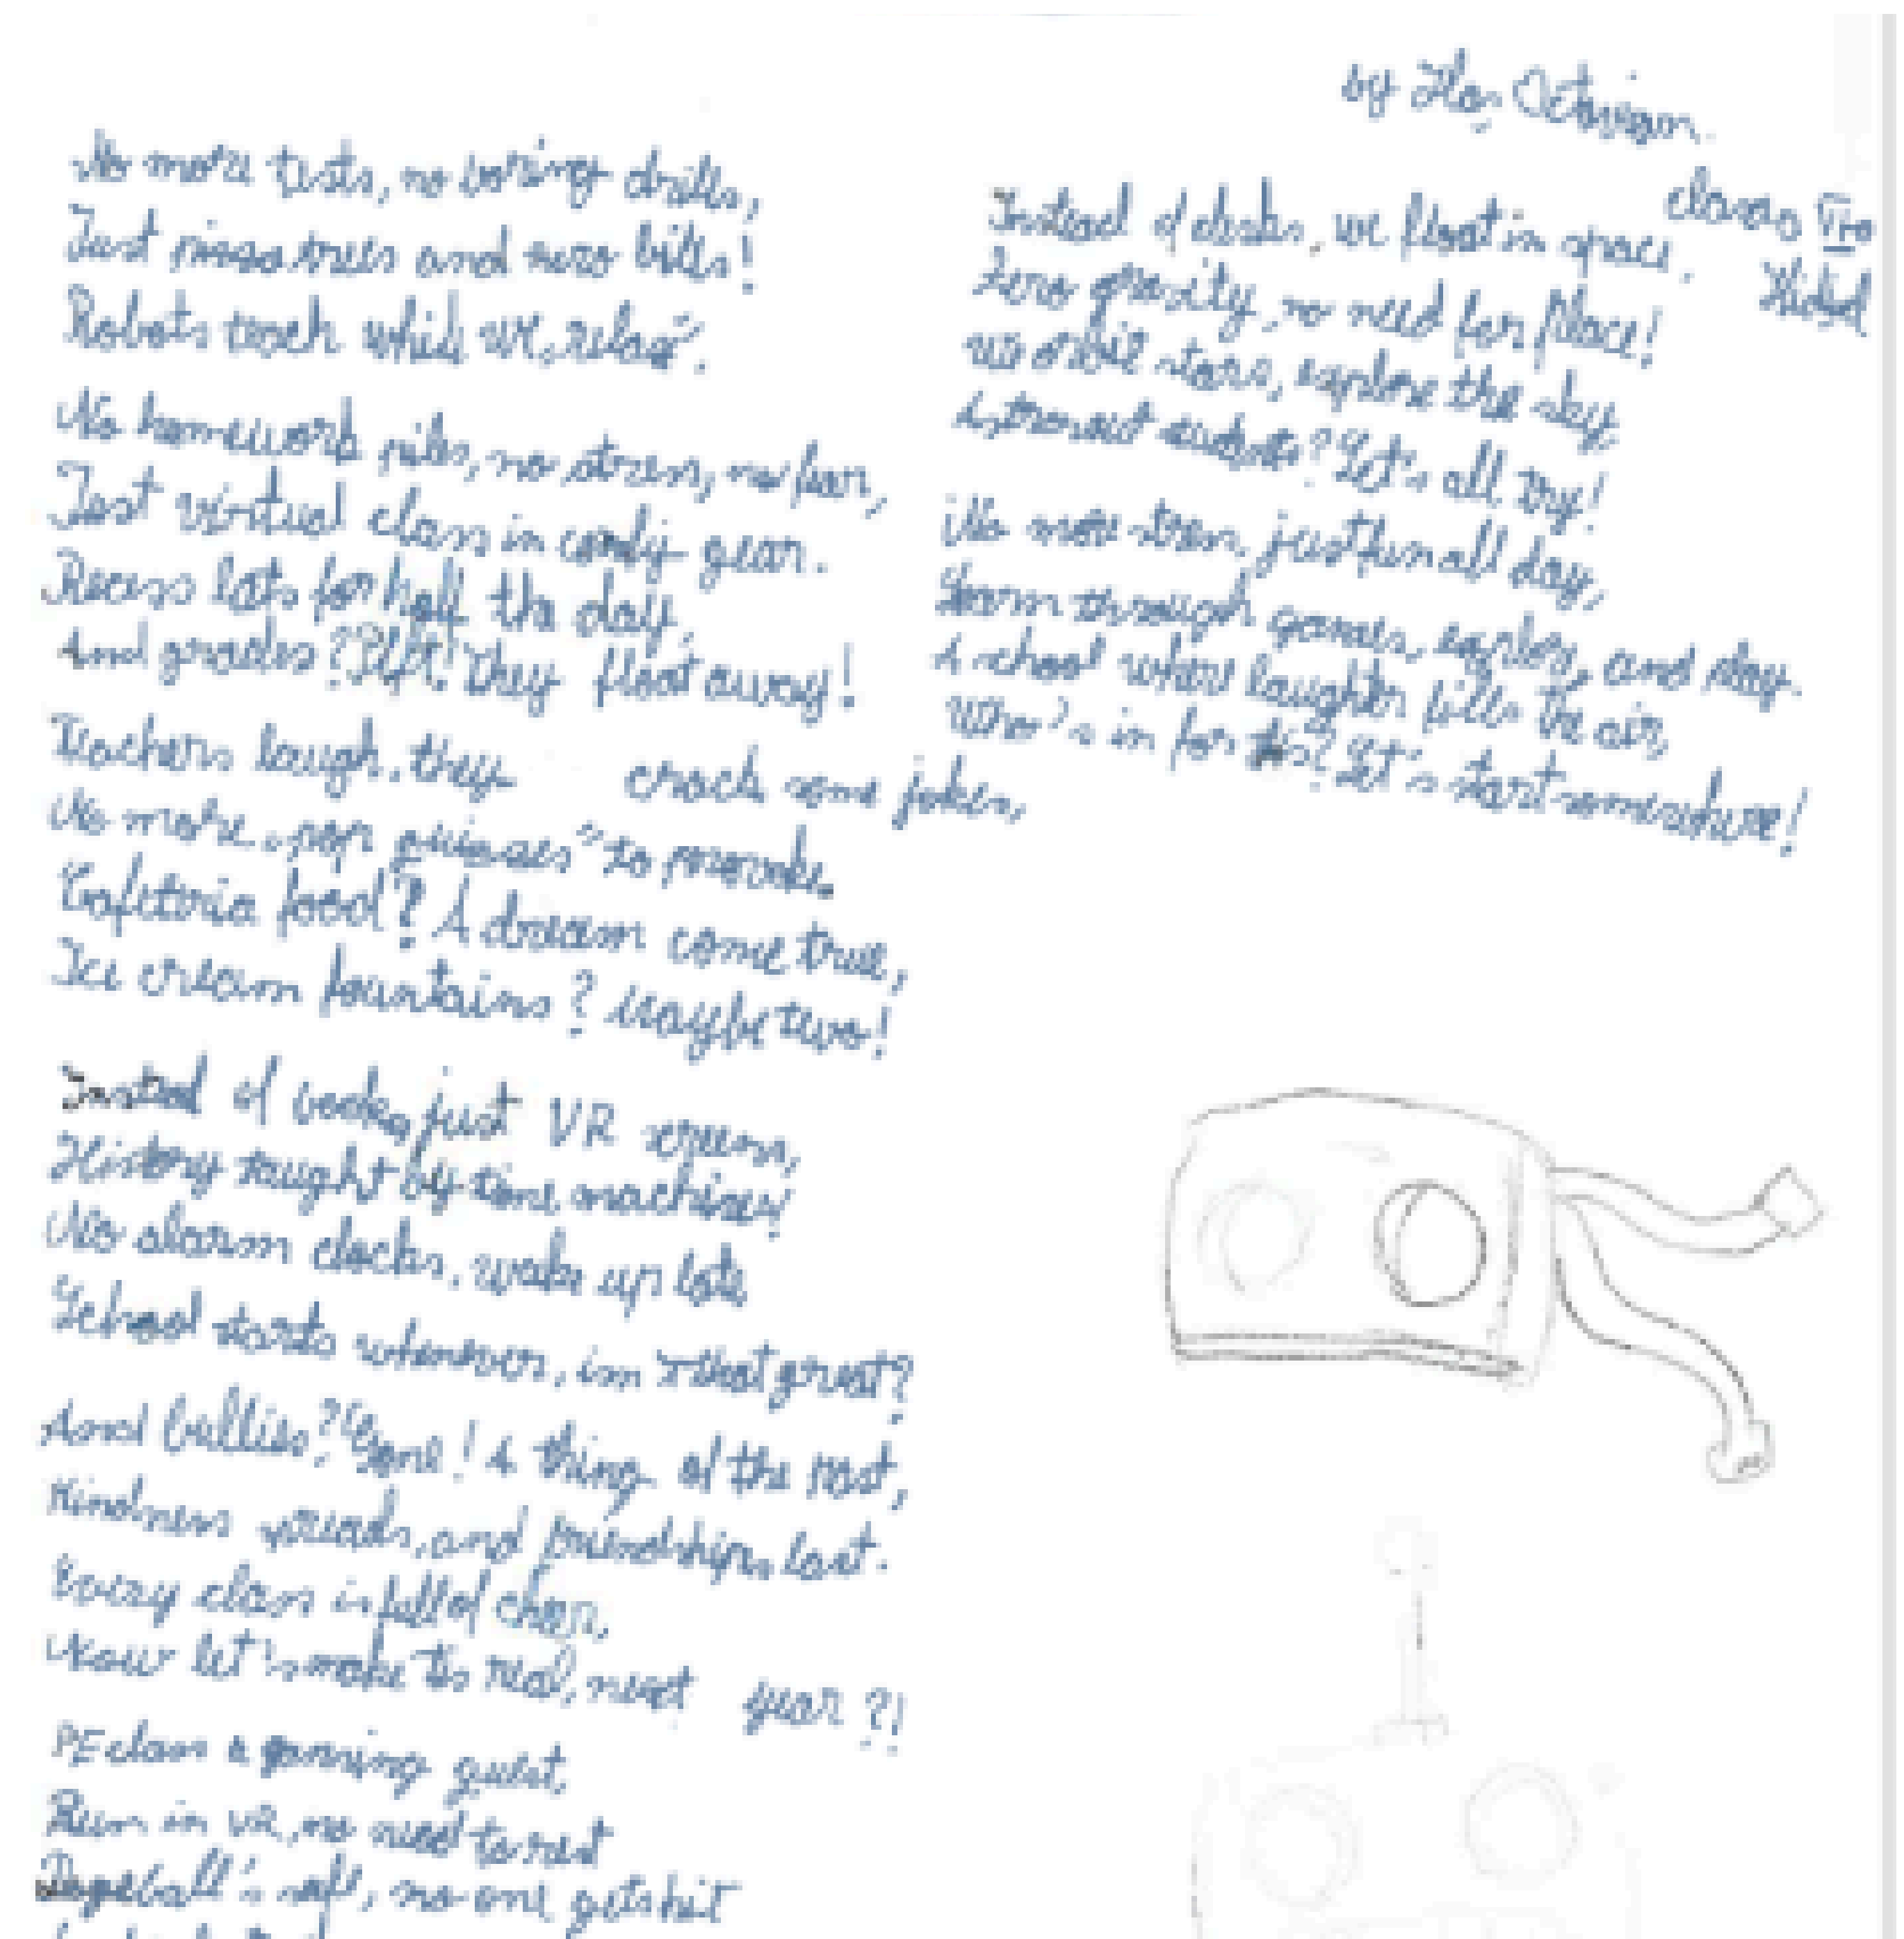

When it comes to discuss about factories...yes, these also brig bad things. They produce a lot of smoke, polluting, which in time will affect the nature, animals and also the humans that live near. These can be stopped by being build far away from the places where people live or having air filters and other things that can help to keep the environment clean and safe.

And last but not least, nuclear experiments. These are very harmful to the world, a way to stop them could be to place them in the wilderness or just to ban them.

In conclusion, this was my presentation, I hope you like it and you definitely learnt something that you will probably apply in the future to have a clean and safe environment as I wish it for.

## The future of school

H.O, Cls. a VI-a  
Şc. Gimn. nr. 1 Hidişel  
prof. B.DM

# ***Limba engleză -ciclul primar***

## **Save the planet.**

B.D, cls. a II-a  
Școala Gimnazială Nr. 1 Chișlaz  
prof. C. AC

My name is Denis. I'm eight years old. I'm from Romania. I live in a small village called Chișlaz. I'm short and slim. I've got short brown hair and brown eyes. In my free time I like playing video games and reading books. My favourite season is spring because I can spend more time outside. I live in a house with a big garden. In my garden there are beautiful flowers like roses and violets. I love gardening and last year I planted some trees with my father. I want to protect nature and that's why I take care not to throw rubbish on the ground and I also place garbage in special bins. I don't use the car all the time, to go somewhere, I use the bicycle instead or I walk with friends. We have to be friends with nature and protect it!

## **The mighty mountains**

N.Ș., cls. a III-a  
Școala Gimnazială Coresi Târgoviște  
prof. C.T

Big tall mountains touch the sky,  
Birds and clouds go flying by.  
Rivers run and trees stand tall,  
I love nature best of all.

So strong, so grand, they never fall,  
They stay proud and firm for all.  
A place of wander, wild and free,  
The mountains call for you and me.

Snowy peaks and valleys deep,  
Little bees and rabbit leap,  
The sun goes down, the stars all shine,  
The mountains stay for all the time.

## Together for a better future

V. AE, cls a IV-a  
Liceul Tehnologic Telciu  
prof. V.AE

Hello! I am the Earth, your home. I am here for a very long time, taking care of you. I give you clean air to breathe, fresh water to drink, and beautiful forests and animals to enjoy. But now, I need your help to make a better future for all of us.

Sometimes, I feel tired because people forget to take care of me.

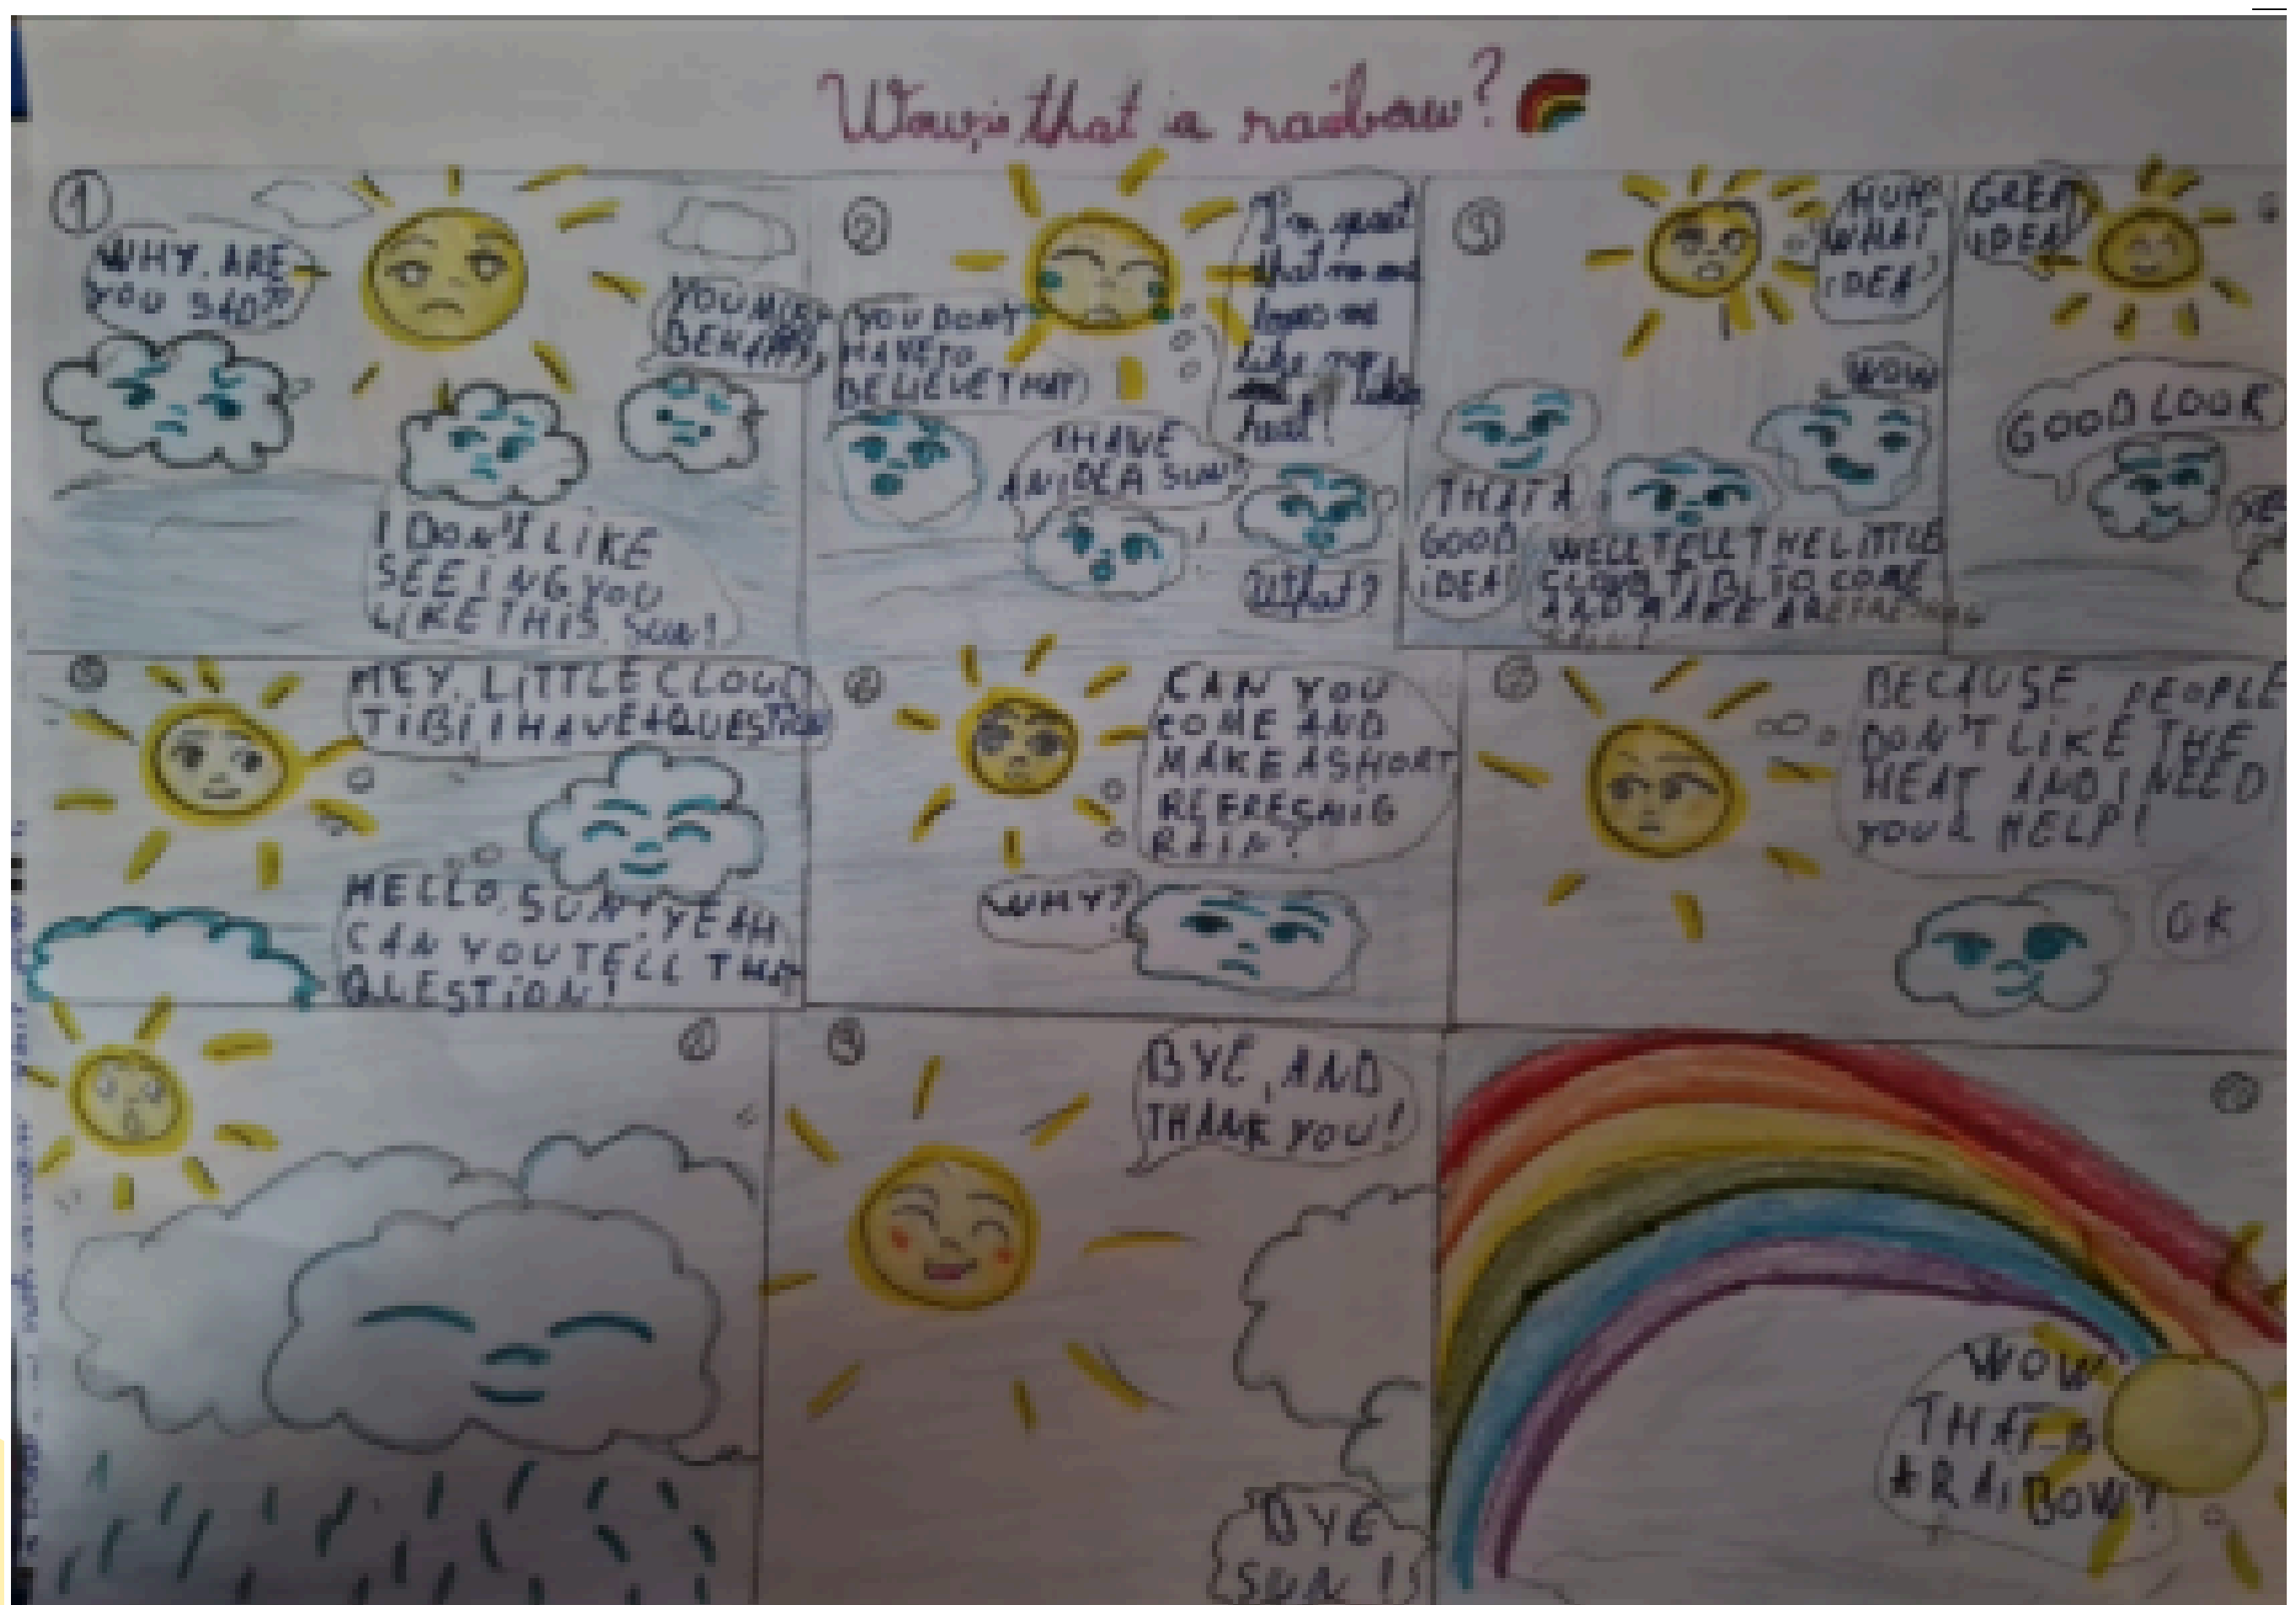

There is too much trash in my rivers, my forests are being cut down, and the air is getting dirty. It makes me sad because I want to stay beautiful and strong for you.

A better future is possible if we all work together. You can help me by throwing trash in the right place, planting more trees, and saving water. Even small things like turning off the lights when you don't need them can make a big difference. When you take care of me, I feel happy and can keep giving you everything you need.

Working together is very powerful. If everyone on Earth helps just a little, we can make the future amazing. The animals, plants, and even the air will feel fresh and full of life again. You and I can live in harmony, just like we were meant to.

So please, let's work together for a better future. When you help me, I promise to take care of you too. Together, we can make our world a safe, happy, and beautiful place for everyone

B.S, cls. a IV-a  
LTP Baia Mare  
prof. C.D

## Desire

V.M,  
Șc. Gimn. Coresi, Trgoviște  
prof. C.T

When I look at the beautiful sky  
With silver glitter, and then,  
I think about my hope and pray  
I share this with everyone: boys, girls, women and men.

I would launch into a storytelling,  
With boys and many girls.  
And together lift without crying,  
Lanterns with our wishes.

And my wish would be  
That me and you, him and her  
To cross mountains, oceans, and whatever obstacles there may be,  
Let it all be nothing more than a spring flower in bloom.

# Limba franceză

## Ensemble pour un avenir meilleur

L.AM, cls. a VII-a  
Șc. Gimn. Șerban Cioculescu, Găești  
prof. M.L

Espoir et paix dans nos cœurs,  
Nous avançons sans peur.  
Solidaires main dans la main,  
Écoutons, aidons, soyons humains.  
Même petits, nos gestes comptent,  
Bâtissons un monde qui raconte  
L'histoire d'un futur plus beau,  
Éclairé par mille flambeaux.  
Pour la Terre et l'avenir,  
Osons rêver et agir.  
Unissons nos forces ensemble,  
Rien n'est impossible, tout rassemble.  
Un monde juste et solidaire,  
Nous pouvons en être fiers.  
Avec courage et bienveillance,  
Vivons tous en harmonie.  
Efforçons-nous chaque jour,  
Ne brisons pas cet amour.  
Imaginons des lendemains  
Rayonnants sous nos mains.  
Main dans la main, avançons,  
Écrivons notre belle histoire,  
Il suffit d'un peu d'espoir,  
Le futur sera radieux,  
Libre, joyeux et généreux.  
Ensemble, construisons demain,  
Un monde serein et sans chagrin.  
Rêvons grand, car tout est possible !

## Un monde meilleur

Ș.AM, cls. a VIII-a  
Școala Gimnazială „Buică Ionescu”  
Glodeni  
prof. P.NL

Un monde sans peine et sans douleur.  
C'est ce qu'on rêve depuis toujours.  
Sous le ciel ouvert de la paix,  
On rit ensemble tous les jours.

Un monde de paix on construit ensemble.  
Ce n'est pas du tout difficile à faire.  
Avec les mains tendues vers les gens  
Perdus ou pas, amis ou inconnus.

Un monde meilleur, rempli de joie.  
C'est en notre pouvoir,  
Enfants, adultes, n'importe qui  
Être plus bons, être plus doux.

## Pour un monde meilleur

D.CM, cls. a VIII-a B  
Șc. Gimn. „Buică Ionescu”  
prof. P.NL

À l'aube des rêves, sous le ciel étoilé,  
Donnons force à nos voix  
Avec les coeurs doux on bâtit des palais,  
Un chemin vers demain.

Enfants du futur, adultes du demain,  
Chassons les ombres du mal!  
Nous sommes la source de la paix.  
Nous sommes le changement.

Tendons la mains à ceux qu'en a besoin!  
Vivons en harmonie avec amour!  
Devenons meilleurs jour après jour!  
Pour un monde meilleur.

## La Terre, notre maison

P.AG, cls. a VI-a

Școala Gimnazială Șerban Cioculescu, Găești

Prof. M.L

La nature est un grand trésor,  
Ayons pour elle un vrai accord.  
Tous les jours, prenons en soin,  
Evitons d'abîmer son sein.  
Rivières, forêts, et océans,  
Respirent mieux sans nos déchets gênants.  
Elle nous nourrit, nous fait grandir,  
Nous devons donc la chérir.  
Offrons-lui respect et amour,  
Tout peut changer dès aujourd'hui.  
Relevons ce beau défi,  
Et bâtissons un bel avenir.  
Maintenant, il est temps d'agir,  
Avec de petits gestes simples,  
Il faut penser à demain,  
Sans attendre la fin du chemin.  
Osons protéger notre Terre,  
Notre maison, si belle et fière!

## Ensemble, nous traversons tout!

A.A, cls. a VI-a

Școala Gimnazială Nr.2 Boldești-Scăeni

prof. P.N

Main dans la main, pas à pas,  
On change le monde, c'est pas dur  
La bonté est le premier pas,  
L'avenir est à vous !

Chaque jour est un combat, mais nous ne sommes pas seuls,  
Ensemble, nous traversons tout, tels des héros, avec brio.  
Dans le regard des autres, on voit le même désir,  
Créer un avenir plein d'espoir, avec ferveur.

Soyons doux, soyons unis  
Aidons, donnons  
Avec de grands rêves et des pensées claires  
Construisons un avenir meilleur!

Chaque larme, chaque douleur,  
Cela nous rend plus fort, cela nous donne de la force.  
Et même si parfois on tombe, on se relève,

Parce que nous savons qu'ensemble nous pouvons triompher.

## Prends soin de la nature

M.S, clasa a VII-a  
Școala gimnazială „Nicolae Popoviciu” Beiuș  
prof. B.EM

Aime la fleur, caresse le vent,  
Écoute la rivière, regarde le champ.  
Le soleil sourit, la forêt t'appelle,  
Toute la nature murmure en dentelle.

Mais si tu oublies et ne fais rien,  
La terre pleure sous ton dédain,  
Les bois s'éteignent, les fleurs s'en vont,  
Il ne reste que l'horizon.

## Ensemble pour un meilleur avenir

F.RI, cls. a V-a A  
LVP N. Bolcaș  
prof. I.IA

Le monde dans lequel nous vivons est un trésor précieux. Pour construire un avenir radieux, il est essentiel de s'unir, car l'union fait la force.

D'abord, nous devons protéger notre belle planète. Si nous semons aujourd'hui, nous récolterons demain. Planter des arbres, économiser l'eau et recycler sont des gestes qui font la différence. Une Terre propre et en bonne santé, c'est un avenir plus lumineux pour nous tous !

Ensuite, être bienveillant avec les autres rend le monde plus harmonieux. Un sourire est un rayon de soleil dans la vie de quelqu'un. Dire « merci », aider un ami ou écouter quelqu'un avec attention, ce sont des petites actions qui font une grande différence.

Enfin, l'éducation est la clé du succès. Apprendre, c'est grandir et s'ouvrir au monde. À l'école, chaque leçon nous rapproche d'un avenir meilleur. Avec de la curiosité et de la persévérance, nous pouvons réaliser nos rêves et bâtir un monde rempli de paix, de justice et de bonheur.

Alors, main dans la main, avançons ensemble vers un futur plein d'espoir, car seul, on va plus vite, mais ensemble, on va plus loin !

## Ensemble pour un meilleur avenir

A.A, cls. a VIII-a  
Şc. Gimn. „Dumitru Brezeanu” Teişan  
prof. P.N

Dans un monde plein de ténèbres et de douleur,  
On rêve de jours plus sereins, sans silence.  
Sous le ciel plombé, avec de gros nuages de pluie,  
L'espérance nous appelle, nous ramène à la vie, volontiers.

Nous regardons autour de nous et tout semble perdu,  
Mais dans nos cœurs un feu renaît.  
Même si la route est longue et difficile à traverser,  
Ensemble nous trouverons un avenir meilleur, rêvé, enveloppé.

Dans nos poitrines nous portons des rêves, comme des trésors,  
Et nous n'abandonnons pas, nous nous battons pour des valeurs.  
Parce que nous savons qu'ensemble, rien n'est impossible,  
Même dans les moments les plus difficiles, nous sommes sans aucun doute invincibles.

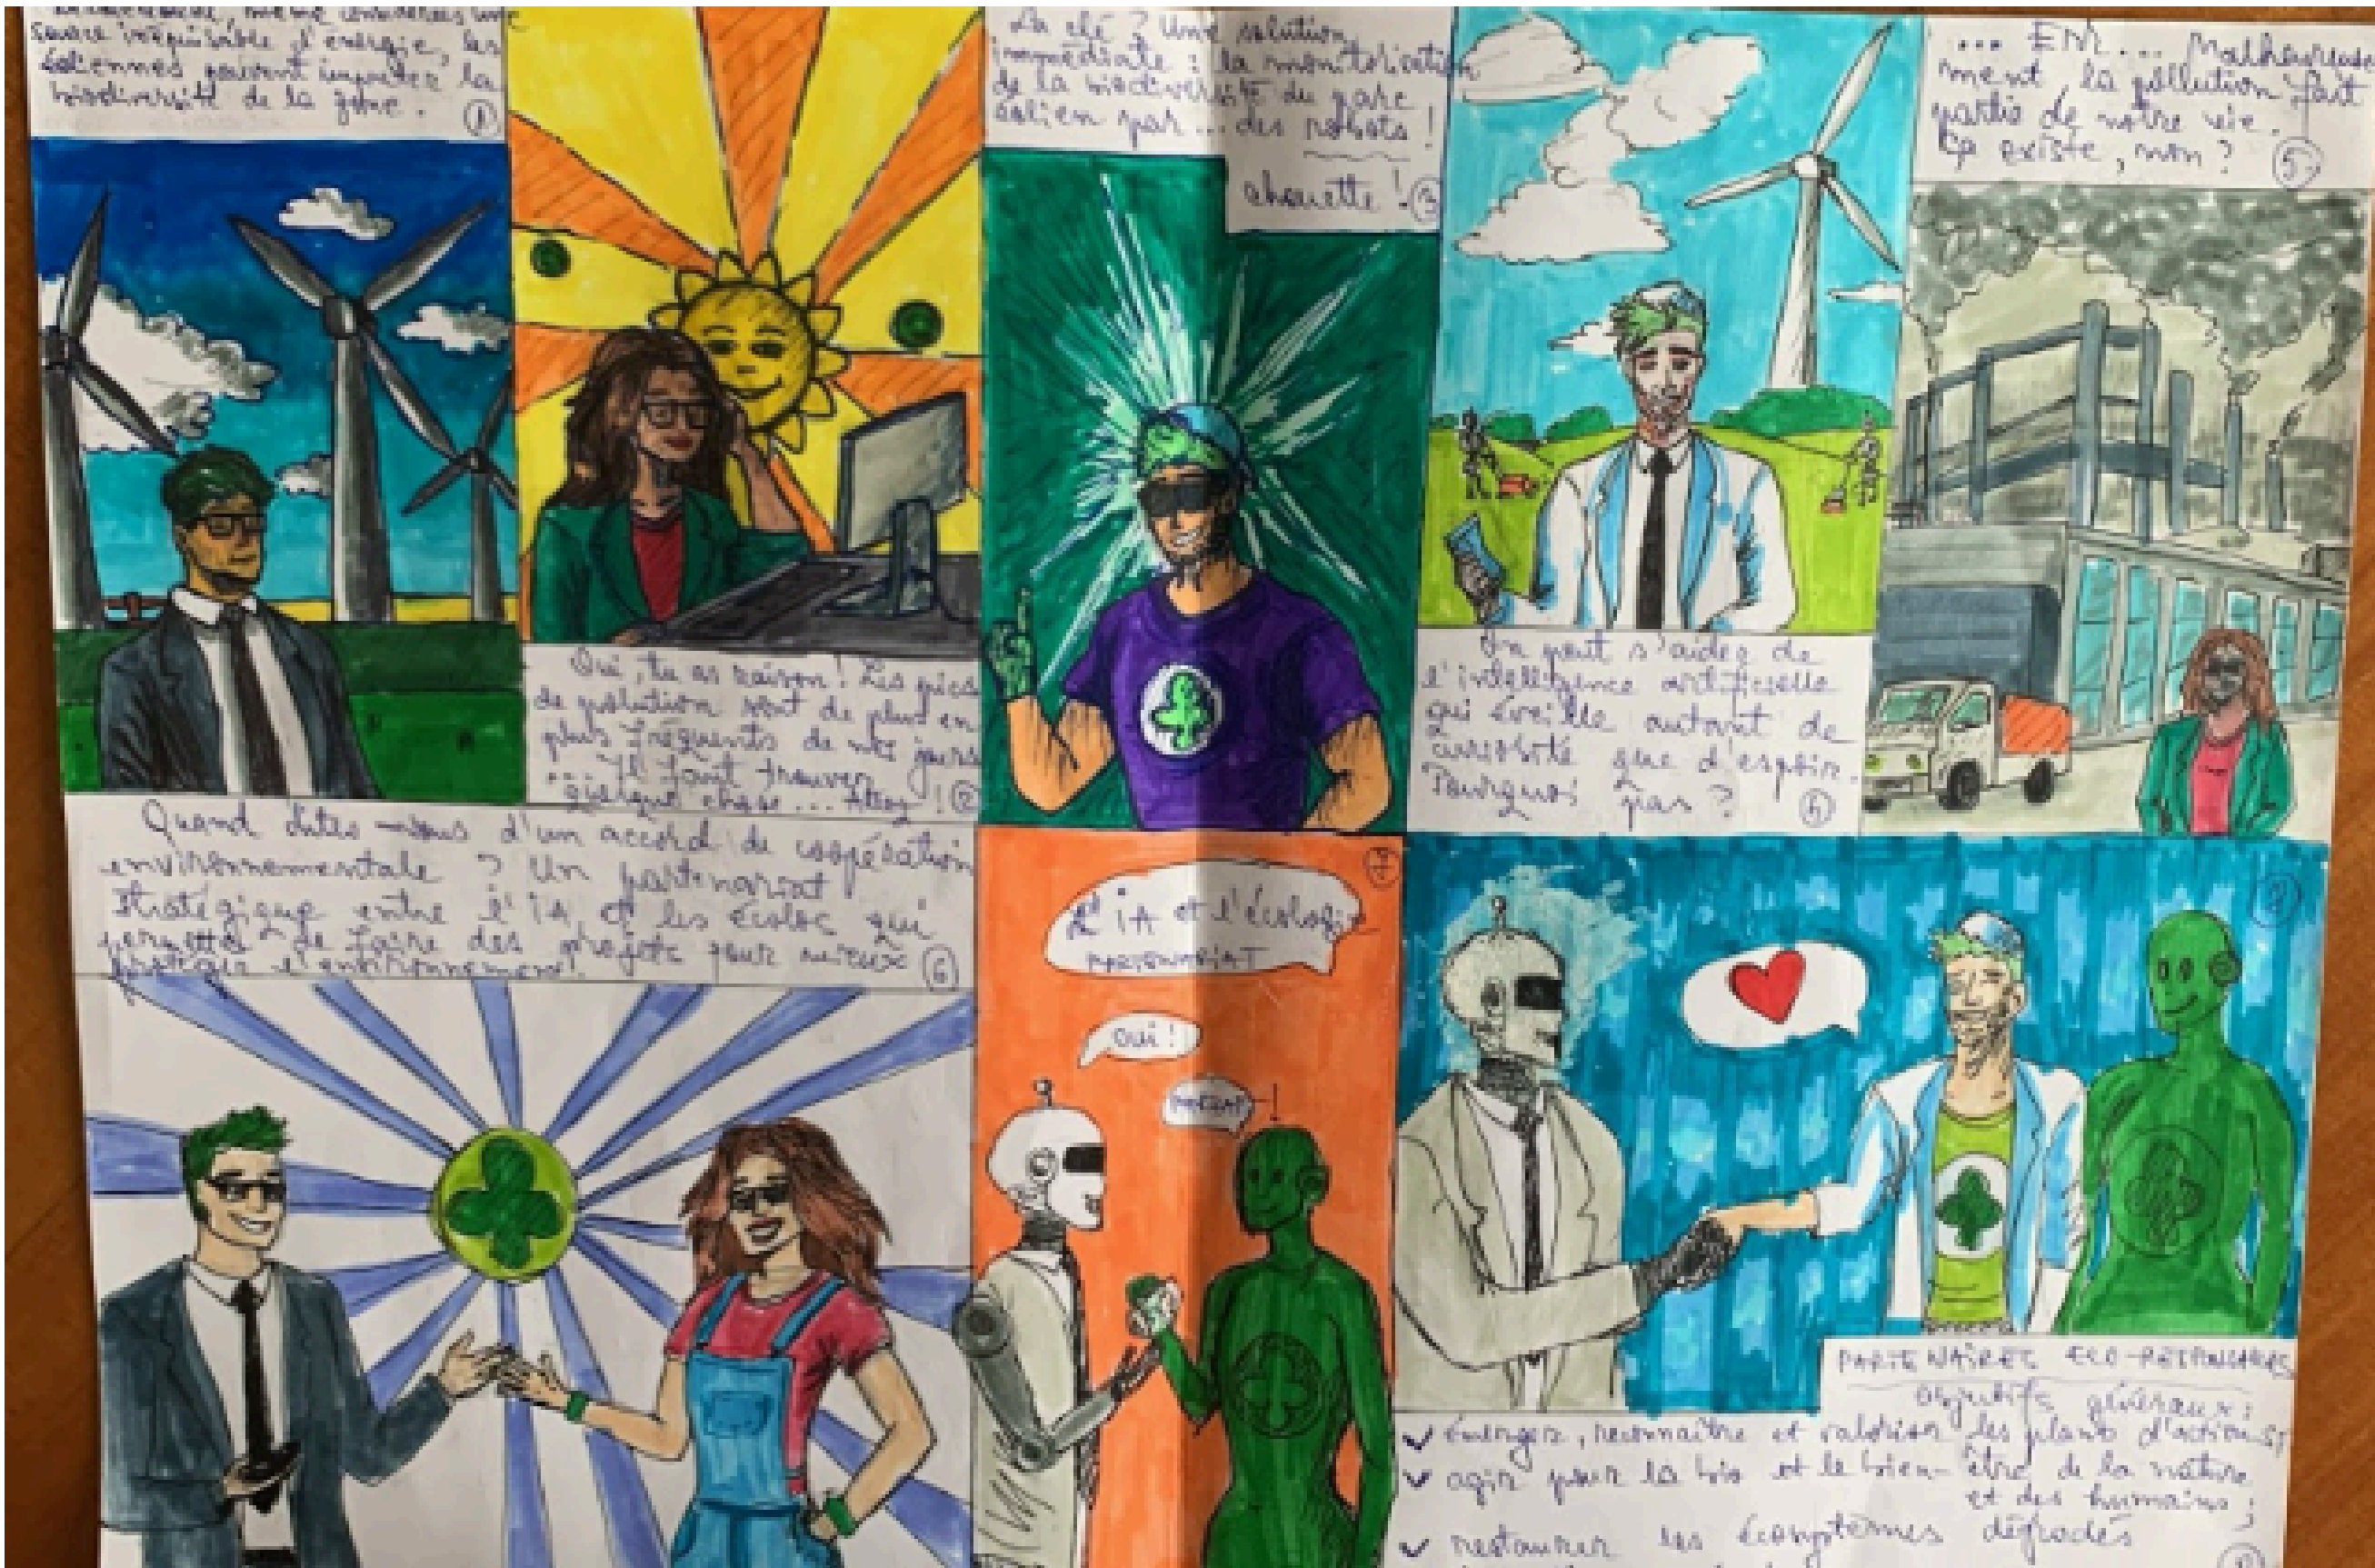

Au clair de lune, dans les nuits silencieuses,  
On se serre la main, promesses inconnues.

Parce que ce n'est qu'ensemble que nous pouvons changer ce qui est mauvais,  
Et construisons toujours un avenir avec un ciel plus bleu.

Les arbres pleurent, les forêts meurent lentement,  
Mais nous plantons des graines pour faire pousser un nouveau départ, avec  
enthousiasme et regret.  
Les rivières coulent troubles, mais nous nettoyons leurs lits,  
Qu'ils redeviennent clairs, comme des larmes de nostalgie.

Les sourires des enfants, le chant des oiseaux à l'aube,  
C'est ainsi que nous imaginons le monde, sans nuages.  
Même si aujourd'hui c'est dur, demain sera meilleur,  
A chaque pas, nous nous rapprochons de la lumière, comme un chant divin
